A great improvement on last week. If we get 100%, I will take the children out for an extra ten minutes on break on the warmest day of the week.

Dear Families,

We have been blessed with some amazing weather already this term and in PE we have been taking great advantage of this as we have started to practise for our sports day.

In science, the children have been continuing to study the parts of plants and the roles these parts play. They have been using their data to create graphs to help them make informed observations.

In history, we have started to study the battle of Britain starting with an orientation of where it fits in with the other areas in history that they have studied. We then moved on to discuss the nations that were involved in the war.

In English, we have started the story of Theseus and the Minotaur. Mrs Arkle has introduced the story and identified what the key ingredients and features of a myth are.

In maths, we are looking at measuring and how to convert between measures. Any help, just quizzing them in the car on the way to school of how many centimetres in a metre, metres in a kilometer, will be appreciated.

Kind regards  
Mr Shelling

	<b>Star of the Week</b>  Harvey Great teamwork in our relay race		<b>Presentation Award</b>  Alfie B Lovely penmanship and a well-deserved pen licence
